A STUDY ON CUSTOMER PREFERENCES TOWARDS VASAN EYE CARE, THANJAVUR

H.MOHAMED AMEEN || Final year MBA

Periyar Maniammai University

Thanjavur.

ABSTRACT

A study of the customer satisfaction towards at vacant eye care hospital is an process which is very useful to monitor the current status about the public image of the vacant eye

eye care hospitals, Here the survey report should examine the results about customer satisfaction on the eye care services around the Thanjavur city, because the new inline services obviously makes only for surrounding people who are living nearer to Vacant Eye care located area. The customer satisfaction is one the major key point to develop their business and sales growth sufficiently; also it's a better idea to understand the current status of vacant eye care hospitals and its activities. Actually the survey about the customer satisfaction level is about identifying the customer needs and understanding their sense depending upon our services. Most of the terms about customer satisfaction survey plan identifies the customer needs to elaborate Vasan eye care service oriented plans as much better from the current level. Also the customer satisfaction analysis is useful to focus on competitor's activities to develop our public image effectively compare with others. The project study aims at understand the customer satisfaction about our eye care services. The tools used for analysis of this research are simple percentage analysis and Chi-square test. By important the study report gives a moral support to updates the current status of vacant eye care internal activities towards the promotion and development.

KEYWORDS : Customer Satisfaction, Vacant Eye Care, Medical Accessories.

INTRODUCTION

Customer satisfaction is a business term which is used to capture the idea of measuring how satisfied an enterprise's customers are with the organization's efforts in a market place. Every organization has customers of some kind. The organization provides products of some kind to its customers through the mechanism of a marketplace. The products the organization provides are subject to competition whether by similar products or by substitution products.

Whether the buyer is satisfied after purchase depends on the offer's performance in relation to the buyer's expectations. In general, satisfaction is a person's feeling of pleasure (or) disappointment resulting from comparing a products perceived performance in relation to his or her expectations. If the performance matches the expectations, the customer is satisfied. If the performance exceeds expectation the customer is highly satisfied delighted the link between customer satisfaction and customer loyalty is not proportional.

3.LITERATURE REVIEW

Schiffman and Kanuk (2004) defines customer satisfaction as "The individual's perception of the performance of the product or service in relation to his or her expectations".

Rahunath (2009) has conducted a research to analyze the marketing of labor Soap Company in kumbakonam city but here nearly 95% of the business growth and marketing based on the customer satisfaction on the product quality and its worth. The study normally gives the better ideal to enhance the business development by the ways of direct marketing in the demonstration of the quality of soaps in rural areas. The important segment has find from here, the role of marketing process has increased the sales ratio, For this purpose a sample of 250 family members was used to get marketing data report on the basis of how the product supports to fulfill their needs.

Total	104	100%

INTERPRETATION

Among the 104 respondents, 11% of respondents rate the satisfaction level is Excellent, 65% of respondents rate the satisfaction level is Very Good, 19% of respondents rate the satisfaction level is Good, 5% of respondents rate the satisfaction level is poor.

TABLE3: CUSTOMER SUPPORT SERVICE

customer support service gives	No Of respondent	Percentage
briefly	26	25%
clear	15	14%
satisfactory	58	57%
not clear	5	4%
Total	104	100%

INTERPRETATION

The table no 3 content, reveals that the customer support to the service, among the 104 respondents, 25% of respondents got the information briefly, 14% of respondents says its not cleared, 57% of respondents says it is satisfactory, 4% of respondents says it is not cleared.

ASSOCIATION FOR RELATIONSHIP BETWEEN SATISFACTION WITH OPTICAL AND THE OVERALL SERVICE

Null Hypothesis (Ho): There is no significant association between optical and customer satisfaction with overall satisfaction with the vasan eye care.

Alternative Hypothesis (Ha): There is significant association between optical and customer satisfaction with overall satisfaction with the vasan eye care.

Optical	Fully satisfied	Just satisfied	Not satisfied	dissatisfied	Total
O					
vera					
ll satis					
faction					
Satisfied	9	29	2	1	41
Very good	3	35	12	1	51
Fair	0	2	5	3	10
poor	0	0	1	1	2
Total	12	66	20	6	104

Calculated value = 39.2505

Degree of Freedom = 9

At 5% of significant level the table value is =16.919

Calculated value > Table Value

39.2505 > 16.919

5. O'Fallon, M.J., and Rutherford, D.G. (2010). Hotel Management and Operations. New York: John Wiley and Sons. 173.

INFERENCE:

There is significant association between optical and customer satisfaction with overall satisfaction with the Vasan Eye Care. So Null hypothesis (H₀) is rejected & Alternative hypothesis is accepted

ASSOCIATION BETWEEN THE NUMBER OF YEARS PERSON IS RECEIVING SERVICE AND THE SERVICES BASED ON MONEY VALUE

Null Hypothesis (H₀): There is no significant association between number of years a person is receiving service and the services based on money value.

Alternative Hypothesis (H_a): There is significant association between number of years a person is receiving service and the services based on money value.

Services of VEC	Less than year	1 year	2 year	Less than 5 year	Total
Money value					
Excellent	2	21	11	3	37
Average	1	23	5	3	32
Good	1	17	8	0	26
Poor	1	2	5	1	9
Total	5	63	29	7	104

Calculated value = 52.189

Degree of Freedom = 9

At 5% significance level the table value is 16.919

Calculated value > Table value

52.189 > 16.919

INFERENCE:

There is significant association between number of years a person is receiving service and the services based on money value. So Null hypothesis (H₀) is rejected & Alternative hypothesis is accepted.

CONCLUSION

This study was done to measure the customer satisfaction at Vasan Eye Care, Tanjavur. The study included the quality, pricing, medication

& consulting of the service provided by Vasan Eye Care towards their customer. The study concludes that customers are very pleased

towards the service provided & Vasan Eye Care has a good opportunity to expand its franchise.
